

## Structure Plane

### Information Architecture

It will be a simple tree.

### Interaction Design (IXD)

- The homepage will have links to the four main-articles. These four articles will also appear in the pulldownmenu, which will also contain a 'Contact' and a 'Home' button.
- The 'Home'-button in the menu bar brings users back to the homepage.
- Each Menu heading has a roll over to confirm that clicking that area has an action.
- The social links to Instagram, Facebook, Twitter and Youtube will have roll-over effects and open in a blank window. On Desktop they will be in the header and in the footer, on mobile they will only be in the footer.
- The article-pages will also show links to the other articles. On mobile they will be below the main-article of the page. On tablet they will also be below the main-article, but in a row of three. On desktop the other articles will be beside the main article.
